8431ZX1233 MEN'S SPEED-ORIENTED FOOTBALL SHOES (SG)

The PEBAX outsole anti-slip insole nanotechnology

The upper is composed of four layers of high-strength materials: flyknit + mesh + skeleton + lamination. It is comfortable and snug, with a decisive force transmission and reduced weight. The streamlined skeleton design increases the visual impact.

The insole utilizes one-way anti-slip technology to reduce the sliding caused by the heat and humidity generated during movement inside the shoe.

The all-new SG outsole design features an electroplated PEBAX nylon outsole, with stud design in the forefoot center, providing flexible turning and strong grip, suitable for soft natural grass fields. It is suitable for use in large-scale competitions.

SIZE: 39-44.5

100
White

One-piece tongue design

The tongue sock design closely fits the instep, with a comfortable fabric design that increases breathability, suitable for high and low insteps, with moderate elasticity and a powerful wrap.

Lightweight, Perforated 4-Layer Upper Design + Nano Coating Technology

The upper is composed of a 4-layer construction featuring flyknit, mesh, and a lightweight skeletal frame. This lightweight, high-strength 4-layer material provides a comfortable, form-fitting feel, delivering a clean, efficient energy transfer while reducing overall weight. The streamlined skeletal frame design also enhances the visual impact. After several rounds of tuning, the elastic compound used achieves an even more skin-tight, lightweight fit, further optimizing the athletic performance. The upper also features 2nd generation nano coating technology, which enhances ball touch and control.

Lock-in Protection Performance

The built-in heel cup provides enhanced protection for the heel, enabling precise accumulation of force. With a more comfortable lining design that closely hugs the instep to prevent rubbing and irritation.

Anti-slip Insole

The insole utilizes one-way anti-slip technology to reduce sliding caused by perspiration buildup inside the shoe. The insole also incorporates KELME advanced material for enhanced rebound and softness.

Nylon + Shua Midsole Design

Upgraded with a nylon forefoot plate and Shua heel cushioning plate.

SG Outsole Design

All-new SG outsole design with electroplated PEBAX nylon compound. Strategically placed studs in the forefoot allow for improved traction and flexibility during turns. Strong grip, making it suitable for use on wet, natural grass field.

9421ZX1226/9421ZX3226 MEN'S/KID'S TACTILE FOOTBALL SHOES (MG)

Imitation Leather Technology Full-Length Insole Board Dynamic Flyknit

The upper utilizes our independently developed imitated leather technology to soften the leather material and close to the texture of genuine leather, providing a soft, comfortable feel and premium touch to the foot. The dynamic flyknit construction offers an excellent wrapping effect and protection.

The all-new MG outsole design, combined with the full-length nylon insole board, enhances resilience in the forefoot, increases torsional resistance in the midfoot. Suitable for daily training and small-to-medium scale competitions.

SIZE: 39-45

KIDS SIZE: 35-38.5

Dynamic Tongue Design

The tongue utilizes an integrated, elastic dynamic flyknit fabric material. This dynamic, stretchy fabric construction promotes an excellent wrapping effect and superior protection.

Latest Kelme proprietary synthetic leather technology + Nano coating technology

The upper utilizes Kelme's proprietary FLEX TCOUCH synthetic leather technology, offering a soft, genuine leather-like feel and comfort for the foot. The leather is also coated with Kelme's 2nd generation nano coating technology, providing a grippy texture that enhances ball control performance. The shoe upper's structural support skeleton prevents over-stretching, improving overall durability.

Friction Particle Technology

The inner strike zone of the shoe utilizes KELME's friction particle technology, which enhances the friction and contact with the ball, enabling more agile ball control and dribbling.

Locked-in Protective Performance

Built-in cup locks to protect the heel, providing precise energy return. The foam-padded heel lining provides enhanced comfort and a closer fit around the ankle, helping to prevent chafing.

Anti-Slip Insole Technology

The insole utilizes anti-slip technology, with a unidirectional design that reduces sliding caused by motion-induced heat and moisture buildup within the shoe. Additionally, the insole incorporates KELME "SHUA" technology materials, which enhances responsiveness and provides a softer, more comfortable feel.

Full-Length Nylon Midsole Design

The shoe features a full-length nylon midsole plate. Enhance resilience in the forefoot, increase torsional resistance in the midfoot.

All-New MG Outsole Design

The shoe features an all-new MG outsole design, with a TPU main sole and an MG stud configuration. The taller outer studs provide enhanced acceleration and speed, while the midfoot studs offer supplementary traction and support for improved grip and turning on artificial grass surfaces. This design is well-suited for the prevalent artificial grass fields commonly found in China.

One-piece Sock Sleeve Design

Provides advanced comfort and good wrapping, preventing any particles from entering the shoe interior

TPU Seamless Friction Particle Technology

TPU molded support on the upper, quick-drying and non-muddy, with friction particle points that enhance passing and shooting precision.

Nylon Midsole Design

The nylon midsole design enhances the anti-torsion function of the shoe, better protecting the arch of the foot and ensuring the safety of the foot during activity.

MG Turf Design

The turf placement and distribution is designed based on ergonomic principles, with strategically positioned stud locations to provide an optimal playing experience on artificial turf. This makes it a suitable choice for youth training and smaller pitch matches.

9412ZX1250/9412ZX3250 MOMENTUM 1.5.4 MEN'S/KID'S SPEED-ORIENTED FOOTBALL SHOES (MG)

One-way anti-slip technology Full-length nylon midsole Nano-coated

The upper is made of four layers of high-strength materials, including flyknit + mesh + skeleton + coating, which is comfortable and fits the foot, exerts force crisply and reduces weight, the speed-type streamline skeleton increases the visual impact.

The insole utilizes one-way anti-slip technology to reduce the sliding caused by the heat and humidity in the shoe compartment.

The new MG sole design is combined with a full-length nylon midsole, the forefoot increases resilience, and the middle waist increases torsion resistance. Suitable for daily training and small and medium-sized competitions.

SIZE: 39-45

KIDS SIZE: 35-38.5

One-piece shoes tongue design

The sock cover design conforms to the foot surface, and the comfortable fabric design enhances breathability. Suitable for both high and low insteps, Moderate elasticity and powerful wrapping.

4 layers of light and breathable cut-out mesh upper+Nanocoating technology

The upper is made of four layers of high-strength materials: flyknit + mesh + skeleton + coating. It is comfortable and fits the foot, exerts force crisply and reduces weight. After several rounds of adjustments, the thin and elastic rubber film can fit the skin better. While being lightweight, it makes the movement more suitable and perfect. The upper of the shoe is added with the second-generation nanocoating technology. The surface layer has a puckery feeling, enhancing the performance of touching and controlling the ball on the upper.

The new MG sole design

The new MG sole design is combined with a full-length nylon midsole, the forefoot increases resilience, and the middle waist increases torsion resistance. Suitable for daily training and artificial grass.

Locking protection performance

The built-in heel cup provides enhanced protection for the heel, enabling precise accumulation of force. The heel lining with foam design is more comfortable, highly fits the ankle to prevent rubbing.

Supported by anti-slip insoles

The insole utilizes one-way anti-slip technology to reduce the sliding caused by hot and humid movement inside the shoe. And the insole incorporates the technology material of Kelme to enhance the rebound and make it softer and more comfortable.

Full-length nylon midsole design

Utilizing a full-length nylon midsole the lightweight nylon material enhances and strengthens the resistance to torsion throughout the entire foot.

Nano Coating Technology Friction Particle Technology Full Palm Nylon Insole Board

The upper uses second-generation nano-coating technology for enhanced friction on the ball. Energy bar system on both sides of the upper supports the upper and enhances wrapping. High-top Dynamic fly knit technology enhances the unity of the shoe and foot.

The new MG outsole design, combined with a full nylon insole board, increases flexibility in the forefoot and torsion resistance in the midsole, making the shoe suitable for most artificial grounds.

Suitable for daily training and small to medium sized competitions.

SIZE: 39-45

KIDS SIZE: 35-38.5

One-piece high-top tongue

Improving Ankle Stability: This feature can limit excessive ankle movement to a certain extent, reducing the risk of injuries such as sprains.
Better support and protection: Providing extra support for the ankle, reducing impact injuries to the ankle caused by movements like pivoting and sudden stops.
Enhanced Wrapping Feel: Allows the player to feel a better fit between the foot and the shoe, enhancing touch and control of the ball.

Heel Protection

Built-in protective cup to protect the heel, the heel has a noticeable inward curve, conforming to ergonomic designs. Fitting the heel during the game.

Energy System

Complementary energy strips on both sides of the upper, with energy support that also reinforces the wrap.

Anti-slip insole

The insole is made of unidirectional anti-slip technology to reduce the sliding generated by the heat and humidity of movement in the inner of the shoe. The insole is made with KELME "SHUA" technology, which enhances the rebound and makes it softer and more comfortable.

Full-length nylon midsole

The full-length nylon insole board enhances rebound in the forefoot and strengthens torsional resistance in the midsection.

Upper with better comfort and control

After several rounds of testing, the lightweight and elastic gel film achieves a more skin-friendly fit, enhancing the lightweight nature of the shoe. This makes movement more fitting and perfect.

LTC Nanocoating Technology

The shoe upper is equipped with KELME second-generation nanocoating technology, which enhances friction between the shoe upper and the ball on wet surfaces.

Friction Particle Technology

The inner side of the shoe upper uses KELME friction particle technology in the ball-contact area to enhance friction and ball contact.

New MG Outsole Design

The new MG sole design, TPU outsole, MG stud pattern, higher outer stud to enhance the players' initial acceleration. The inner midsole is auxiliary to strengthen the grip on the grass and facilitates quick directional changes, suitable for the majority of artificial turf fields in China.

Friction particle technology

The inner ball control zone utilizes Kelme's friction particle technology to enhance friction and responsiveness when touching the ball, enabling agile ball control and dribbling.

Heel lockdown system

The built-in heel cup provides enhanced protection for the heel, enabling precise accumulation of force. The pronounced heel counter curvature follows the ergonomic design, providing a secure, close-to-the-foot fit during play.

Full-length nylon midsole design

The full-length nylon midsole plate features increased rebound in the forefoot as well as enhanced torsional rigidity in the midfoot area.

Anti-slip insole support

The insole utilizes one-way anti-slip technology to reduce sliding caused by moisture and heat buildup within the shoe interior. The insole also incorporates Kelme's cushioning materials for increased responsiveness and enhanced comfort.

The all-new TF (Turf) outsole design

The all-new TF (Turf) outsole design features a cushioned midsole with a midfoot carbon fiber plate for shock absorption and responsive rebound, as well as increased torsional rigidity in the midfoot. The full-length nylon midsole plate also enhances torsional resistance across the entire foot. The durable, multi-studded rubber outsole is suitable for artificial turf surfaces.

9421ZX1225/9421ZX3225 SUMMIT 3.0.4 PRO MEN'S/KID'S COMMAND-AND-CONTROL TYPE FOOTBALL SHOES (TF)

Nanocoating Technology Friction Particle Technology Full-length nylon insole board

The shoe upper adopts second-generation nanocoating technology to enhance ball friction. The energy bar system on both sides of the upper supports the upper while strengthening the wrap. The high-top Flyknit technology improves the integration of the shoe and foot. The new TF outsole design incorporates technology cushioning midsole and a midfoot embedded carbon fiber plate. The cushioning rebound enhances midfoot torsional resistance. The full-length nylon insole board assists in increasing ground push-off speed. Durable rubber outsole with scattered studs, suitable for most artificial turf surfaces. Suitable for daily training and small-scale competitions.

SIZE: 39-45

KIDS SIZE: 35-38.5

One-piece high-top tongue

Improving Ankle Stability: This feature can limit excessive ankle movement to a certain extent, reducing the risk of injuries such as sprains. Better support and protection: Providing extra support for the ankle, reducing impact injuries to the ankle caused by movements like pivoting and sudden stops. Enhanced Wrapping Feel: Allows the player to feel a better fit between the foot and the shoe, enhancing touch and control of the ball.

Heel Protection

Built-in protective cup to protect the heel, the heel has a noticeable inward curve, conforming to ergonomic designs. Fitting the heel during the game.

Energy System

Complementary energy strips on both sides of the upper, with energy support that also reinforces the wrap.

Anti-slip insole

The insole is made of unidirectional anti-slip technology to reduce the sliding generated by the heat and humidity of movement in the inner of the shoe. The insole is made with KELME "SHUA" technology, which enhances the rebound and makes it softer and more comfortable.

Full-length nylon midsole

The full-length nylon insole board enhances rebound in the forefoot and strengthens torsional resistance in the midsection.

Upper with better comfort and control

After several rounds of testing, the lightweight and elastic gel film achieves a more skin-friendly fit, enhancing the lightweight nature of the shoe. This makes movement more fitting and perfect.

LTC Nanocoating Technology

The shoe upper is equipped with KELME second-generation nanocoating technology, which enhances friction between the shoe upper and the ball on wet surfaces.

Friction Particle Technology

The inner side of the shoe upper uses KELME friction particle technology in the ball-contact area to enhance friction and ball contact.

New TF Outsole Design

The all-new TF sole design features a midsole with SHUA technology and a midfoot embedded carbon fiber plate for cushioning rebound and enhanced midfoot torsional resistance. It also includes a full-length nylon insole board, which, being lightweight, enhances overall midsole torsional resistance. Durable rubber outsole with scattered studs, suitable for most artificial turf surfaces.

Upper material

The upper material is made of top-grain calfskin leather with clear texture and a strong sense of quality. Breathable and water-repellent. Soft & comfortable. Great durability with high strength against wear and tear.

Easy to put on & take off with elastic fastening

Shoelaces are designed with a quick and easy elastic fastening system, allowing for convenient wearing and removal with just one hand. Eyelets on both sides includes TPU components to enhance durability, making it less prone to damage even with long-term pulling.

Comfortable outsole

Midsole is made of soft and comfortable popcorn material, providing strong rebound and cushioning. Full rubber outsole is slip-resistant and wear-resistant, suitable for daily wear and sports activities.
